We soon struck several good geode and after loading up we started for the entrance and arrived there at 5:45 P.M.
at 7:25 M.A. Moore & I went in the cove to try to find some quartz crystals. We went on the Snow Ball Route but not until we got to the Post Office, turning to the right at this end of the room. We discovered quartz crystals at the top of a crevice nearly over the Fair Maids pathway but they were imbedded in the rock so that it is nerly impossible to get them out. We gave it up however and started out of the cove, arriving at the entrance at 9:00 P.M

Tuesday March 10th 91

4:45 in cove Crystal Route 2 trips

We got up late this morning as we generaly do when we are in the cove the most of the time the day before. Father & I got a box of specimens packed this forenoon & got started in the cove at 11:45 this forenoon. We went the Crystal Route with the intention of getting the crystals that I discovered on the 13th & 15th of February 1891 When we got to the second large room on the main passage I left M.A. Moore & Father & come out ahead of them in Crystal Palace by a private passage of my own discovery. When we got to the South End of Crystal Palace I discovered a fine quartz crystal similar to the "Fairies Palace". I worked out the most of the first division of the pocket & we loaded up & started for the entrance arriving there at 2:00 P.M at 4:00 P.M M.A. Moore Elmer & I went to the south end of Crystal Palace after a load of quartz crystals
