

## Structure and Function Bingo: Teacher Guide

<u>Structure</u>	<u>Function</u>
	Free Space
Roots 	This structure allows trees to suck water and moisture out of the soil
Teeth 	This allows the banana slug to chew and eat just about anything it finds
Sharp Teeth 	These are used for eating meat
Tentacles 	This allows the banana slug to sense the world around them and find food
Needles 	This structure collects sunlight so the plant can make its own food
Arm 	This structure carries a peanut butter and jelly sandwich to your mouth
Slime 	This protects the banana slug as it slides over the forest floor and helps it not be eaten by other animals

## Structure and Function Bingo: Teacher Guide

Flat Teeth		These are used for eating plants
Hand		This structure picks up the peanut butter and jelly sandwich
Bark		This structure protects trees like a suit of armor
Cones		This structure carries thousands of little seeds for the tree
Flat and Sharp Teeth		These are used for eating plants and meat
Breathing Hole		This allows the banana slug to breathe harder when it's exercising
Mouth		This structure enjoys eating peanut butter and jelly sandwiches
Foot		This functions to move a banana slug from place to place
