SOLAR PANELS

Absorb sunlight as a source of energy to generate electricity and/or heat.

LED BULBS

Light-emitting diode (LED) bulbs are extremely energy efficient and consume up to 90% less power than regular light bulbs.

SOLAR PLATE COLLECTORS

Large, metal boxes that sit on top of a roof and heat water using the sun's energy.

SKYLIGHTS

A window installed in a roof or ceiling that lets in natural light, minimizing use of electricity.

SOLAR FURNACE

Large, mirror-like boxes that use the sun's energy to heat air before it enters the building.

MULTI-LAYERED WINDOWS

Windows with two or more layers of glass that minimize heat loss of a building.
