Thanks for the electronic version of the talking points Howard. I'm glad it's been quiet on the news front, but I won't be surprised if we get jammed up from individuals and groups that want to express their displeasure, including re energizing the White House petition drive effort.

So, in particular what is the strategy in the event that calls start coming in to the PWRO front office? Emails? Calls to WASO? Please work directly with Craig - I've gotten only one email so far, and forwarded it to you all at the park this afternoon.

Thanks

Chris

Chris, Martha, Stephanie, and Craig:

I believe we left a copy of these Talking Points/FAQs when we were over there on Jan 30, but here's an electronic version.

It's been eerily quiet since the press release on Monday, but it may be nothing more than general lack of concern by the media and broad public. Certain stakeholders are exercised over this, of course, but I think it may not be particularly newsworthy. There seems to be much more interest in Frank's news.

Fingers crossed.

Howard
