Subject: Panoramic/Four Corners.....

Good evening.....

Just following up to the meeting tonight. A couple of primary concerns (but by no means my only ones):

- The language about Santos Meadow development, and White Gate Ranch, were NOT even addressed, at all. I believe this was part of Congressman Huffman's very specific ask of Frank Dean. I submitted a question about it, but Howard Levitt, in his sifting through the comments, must have decided that he just didn't feel like answering it.
- The other issue is that the "clarification" issued tonight did NOT actually remove language about future development on Panoramic. It gets a giant "F" for passing for what the Congressman and our Supervisors asked of Frank Dean. Again, the ask was very specific--"Remove this language from the General Management Plan immediately." That was NOT done. Still up for consideration, and remaining in the plan, are non-descript trailhead parking, paving, restrooms, transit connections and interpretive exhibits at Panoramic/Four Corners. Nothing has changed, except the Park Service is again asserting that the plans for Four Corners aren't what they seem.
- The NPS refuses to acknowledge that Muir Woods needs a SANE carrying capacity, founded on scientific principles and peer-reviewed data, not satisfaction studies of park visitors. Without a carrying capacity, I sense a tremendous amount of trouble ahead.

Thank you all in advance for your prompt attention on this very important matter.

Very best regards,

Laura Pandapas
