Golden Gate National Recreation Area (CA) – General Management Plan. The final GMP/EIS for Golden Gate National Recreation Area including Alcatraz Island, and Muir Woods National Monument was released on April 25, 2014. A Record of Decision (ROD) documenting the decision rationale and responding to questions and concerns raised by the public and elected officials is now ready to be signed by the Regional Director. The organized off-leash dog walking community continues to misrepresent the GMP as a way for the park to reduce recreation opportunities, and to ban dogs. A small but vocal minority of residents of southern Marin County have incorrectly characterized the GMP as a plan for increased visitation and development at Muir Woods. Both of these stakeholder groups launched campaigns demanding that the Regional Director not sign the ROD. Park management has worked with local communities and political offices to clear up any misunderstandings and to correct the information being put out by outside interests.
