Dear Amy,

I am co-chair of research for the Mount Tam Task Force. We have included your wonderful book "New Guardians for the Golden Age" on our website.

www.mounttamtaskforce.com I look forward to reading it and meeting you.

Our website includes many facts that have been well researched. For instance, we find potential for a 46% increase in visitors being accommodated in Muir Woods National Monument and its environs. Environmental impacts and safety are already key issues.

A recent letter sent to the Park Service Superintendent Dean from Congressman Huffman outlines just some of the issues with the plan. (attached below) He states: " I recommend in the strongest terms that you remove this language from the General Management Plan immediately and provide the community with a written confirmation that there are no plans for more parking lots on Panoramic Drive, Santos Meadows or White Gate Ranch."

We hope you will take the opportunity to understand our issues and impacts to local communities. GGNRA and NPS should be looking to protect nature's jewel of the Bay Area, the State and the Nation for future generations.

Sincerely,

Laura Chariton, Co-Chair Research, Mount Tam Task Force
