Hi Howard,

Sorry this is later than I expected. Had tech problems with Kris's mac and had to get apple to install a program to read the word doc. the, last night after editing, I got a disk exceeded message not allowing me to save nor attach the file to email. this evening I am now on my father-in-laws computer sending this with a flash drive.

In any event, as you will see, I have many comments/suggestions for reworking this based both on my knowledge of topics and nuances. Let's talk this over on Monday. I will also have an additional 7-8 question by tomorrow based on public comment that will definitely come up.

Finally, I am very concerned about this mtg with Spier and save rec and do not want Chris to be blindsided or set up to commit to something that we all cannot discuss first which experiences tells me is their intent.

**Anyway that you can make it to that mtg today? I think it would be helpful for her to have you to play off of.

Mike
