Subject: crissy field dog group's comment letter on the ggnra's general mgt plan
Date: Tuesday, May 20, 2014 10:19:22 PM

hi [chris](#),

[cfdg](#) is deeply concerned about the [ggnra' s gmp](#) as currently written. we ask that you NOT to sign it, take it off of the table for now and reconsider what the public wants and merge it with the dog mgt plan.

[pls](#) remember that this is a recreation area as mandated by congress in 1972 and the [ggnra](#) can not unilaterally decide what is to happen on public lands earmarked for recreation without meaningful public participation and dialogue.

there are many recreational users that have enjoyed and continue to enjoy all different types of activities in [ggnra](#) lands and we want the future to be kept wide open for all types of these activities. there are many opportunities through mitigation measures and common sense to allow for such activities.

the ggnra is not a national park like the great smoky mountains, zion, or yellowstone but an urban recreation area.

[i](#) would be happy to come to your office and meet with you at your earliest convenience.

best regards,

[martha walters](#)
