Subject: Crissy Field Dog Group's letter to the GGNRA re: GGNRA's General Management Plan

hi all,

here is cfdg's letter regarding the ggnra's gmp. we are deeply concerned about the nps western regional director signing this document on may 30th. as you can see after reading this letter, the ggnra continues not to listen to the public's comments and more importantly, is stepping away from the 1972 enabling legislation which was extremely clear in designating the ggnra as an "urban recreation area", not a national park.

dr. ed wayburn, an ardent environmentalist who played a central role in establishing the ggnra, understood this distinction as helped to save over 100 million acres (yes, 100 million acres) of wilderness lands in the us during his lifetime.

cfdg's thinks that the current gmp should taken off of the table for now and the ggnra/nps reconsider the public's comments from 2011 as well as integrating this nepa process with the dog mgt plan too.

this letter clearly illustrates some serious legal flaws and we have provided some maps as visual aids.

i am happy to discuss our concerns with anyone.

best regards,

martha
