Hi Martha:

I have already told you what the Crissy refresh is - it is a process to look at needed improvements after more than 13 years of intensive public use of one of the most popular public spaces in the country.

I have also already told you that the refresh is a project of the Parks Conservancy and the NPS. Until we determine what improvements we want to make, we don't know what it will cost, nor do we know who will pay for it. We are hopeful that the same community generosity that enabled the original spectacular transformation of Crissy Field will come into play in the refresh.

We are also hopeful that the improvements will come soon, but again, we won't have a timeline until we know what it is that we will be undertaking.

We hope you will join in the excitement about the prospect of improvements to this world-class site.

Best.

Howard

hi howard and alex,

first, thank you for the hard copy and cd of the gmp. i picked it up yesterday morning.

and i wanted to touch base to figure out about the crissy field "refresh". what is the refresh and when will this refresh take place, and who is in charge of the refresh? and how much will it cost? who is paying for it?

i have heard about this effort for some time now but there isn't any public information about it other than that a refresh will happen at crissy field, and there is no time frame associated with it.

it seems like the public should be involved with this process but again it is unclear "it" is.

again, many thanks for the documents.

martha
