

## Beyond the Confluence

Islands Abound! In the 21 km (13 mi) below the confluence, islands become numerous and there are generally one or two obvious main channels.

The river section shown above starts 22 km (13.5 mi) from the outlet of Kukaklek Lake and approximately 1.5-2 km (about 1 mi) past the confluence of the Alagnak and the Nonvianuk Rivers (see inset).

Confluence area from page 18.
