

Stock Site Evaluation Project Gravelly Ford Trail Camp

Yosemite National Park
California

National Park Service
U.S. Department of the Interior

Forage Area: There is very limited forage at this site.

Gravelly Ford Trail Camp

Camp ID: 25

Fire ring: 283,324mE x 4,158,325mN

Handling Practices: This site is not suitable for overnight groups and should only be used as a drop camp. This is due to the potential for stock use to cause impacts to the sensitive resources in this area and the lack of forage. There are also not suitable alternative sites in this area. The closest suitable camp is 4.25 miles away at Lower Chain Lake. For use as a drop camp, the access route follows a social trail north approximately 50 m from the NPS system trail to the fire ring. The unloading area is at the fire ring.
